EDUCATION

University Of Massachusetts Amherst: Master of Science in Data Science Graduating May 2026
Relevant Coursework: Data Science Fundamentals, Intro to Quantitative Analysis, Data Engineering, Machine Learning

University Of Mumbai: Bachelor of Engineering in Electronics and Telecommunication Graduated May 2024
Relevant Coursework: Neural Networks and Fuzzy Logic, Object Oriented Programming, Python Programming, Corporate Finance Management

WORK EXPERIENCE

University Of Massachusetts Amherst Sep 2024 - Present
Data Intern

- Analyzed 40+ weeks of food waste data, reporting weekly losses to inform sustainability efforts at UMass Dining.
- Tracked \$500K+ in annual purchases using FoodPro to identify cost-saving trends from invoice data.
- Designed Tableau dashboards to visualize waste and purchasing patterns, aiding decisions that reduced excess inventory and costs.

HDFC ERGO General Insurance Company Aug 2023 - Apr 2024
Software Developer Intern

- Developed web applications using JavaScript, HTML, CSS, and C in Microsoft's ASP.NET MVC framework, enhancing page load speed by 6.3%.
- Refined database queries for datasets containing confidential client information, boosting retrieval efficiency by 9%.
- Collaborated and incrementally developed and tested code for the Ezeepay app, integrating user feedback to enhance functionality and user experience.

Clairvoyant Software Technologies Pvt. Ltd. Jun 2023 - Aug 2023
Data Science Intern

- Improved information retrieval by optimizing MySQL queries, cutting query execution time by 13%.
- Implemented predictive models that improved forecasting accuracy by 3.2%.
- Developed advanced data visualizations, enhancing stakeholder insights and decision-making efficiency.

DJS Skylark Aero Modelling Team Jun 2022 - Jul 2023
Programmer and Data Team Member

- Engineered and built fixed-wing aircraft for the 2022 SAE Aero Design competition, placing 3rd globally.
- Analyzed over 10,000 configurations in MATLAB, refining flight performance and reducing prototype costs.
- Scripted, designed, and delivered a technical presentation at the competition, effectively summarizing a year-long project to judges and peers.

TECHNICAL SKILLS

Programming Languages: Python, R, C++, C#, JavaScript, MATLAB.
Libraries, Frameworks and Software: NumPy, Pandas, Matplotlib, PyTorch, TensorFlow, Power BI, Docker, SQL, Solid-works.

PROJECTS

Gender Pay Disparity Analysis [Link](#)
• Led a comprehensive analysis of gender-based pay disparities using a Glassdoor dataset, identifying an **\$8,304 average base pay gap**.
• Developed and deployed a multiple regression model, achieving **65.8% variance explanation** in base pay through factors like gender, education, and seniority.

Reddit Data Engineering and Analysis [Link](#)
• Designed and implemented an ETL pipeline to process **100,000+ Reddit records**, leveraging web crawling and **integrating PostgreSQL for optimized storage and retrieval**.
• Containerized the project using **Docker**, ensuring seamless deployment and **cross-environment consistency**.
• Developed an **interactive dashboard in Streamlit**, enabling real-time visualization of subreddit trends.
